

Anagha M

AI Engineer

Thrissur, Kerala — anagha2162@gmail.com — +91 9207302985 — linkedin.com/in/anagha-m01
— github.com/anagha-m01 — Portfolio: anagha-m01.github.io

Professional Summary

AI Engineer experienced in agentic AI applications, multi-agent LLM workflows with LangGraph orchestration, RAG systems, and production backend services using Python, FastAPI, PostgreSQL, Redis, and Docker. Skilled in REST API design, third-party integrations (WhatsApp Business, Meta Cloud API), vector search, and workflow automation for scalable, real-world AI solutions.

Technical Skills

- **AI / Generative AI:** LLMs, RAG, Multi-Agent Systems, LangGraph, Guardrails & Human-in-the-Loop Workflows, Prompt Engineering, LangChain, Vector Databases (Pinecone, pgvector), Semantic Search, NLP, Computer Vision
- **Languages & Frameworks:** Python, SQL, FastAPI, React, REST APIs
- **ML/DL Libraries:** scikit-learn, TensorFlow, Keras, Pandas, NumPy, Matplotlib, Seaborn, OpenCV, MediaPipe
- **Data & Infrastructure:** PostgreSQL (pgvector), Redis, Elasticsearch, MySQL, Docker, WhatsApp Business API / Meta Cloud API Integrations, Streamlit, n8n, Google Colab, Git

Experience

Software Engineer Intern, QuanHack Solutions – Kochi, Kerala Mar 2026 – Present

- Built agentic AI and full-stack applications using Python, FastAPI, React, REST APIs, and LLM orchestration frameworks, automating semantic search workflows and reducing manual data retrieval by 60%.
- Developed REST API endpoints and vector similarity search pipelines using PostgreSQL and pgvector, improving semantic retrieval accuracy by 30% over keyword-based search.
- Designed multi-agent LLM workflows with LangGraph-based orchestration, incorporating human-in-the-loop approval gates and guardrail systems for reliable, production-oriented AI agent behavior.
- Integrated third-party platforms, including WhatsApp Business and Meta Cloud API, into backend services using Redis-backed asynchronous task queues, and Dockerized components to support scalable, production-ready systems.

Data Science Trainee, Luminar Technolab – Kochi, Kerala Jun 2025 – Feb 2026

- Delivered capstone projects applying classification and predictive analytics techniques in Python (Pandas, NumPy) to real-world datasets, translating raw data into actionable business insights.
- Applied NLP and computer vision techniques within training projects and presented findings through interactive Streamlit dashboards.

Application Engineer, Centum Controls Pvt. Ltd – Chennai, Tamil Nadu Sep 2024 – Apr 2025

- Deployed PLC, DCS, and SCADA solutions, managing I/O databases, alarm configuration, testing, and commissioning to ensure reliable process automation and on-time project delivery.

Projects

Agentic Learning Coach

- Built a multi-agent AI learning platform with a FastAPI backend and React frontend, orchestrating five cooperating LLM agents (skill analysis, planning, question generation, evaluation, feedback) via the Groq API to generate adaptive, day-by-day study plans.
- Implemented Pydantic-based input validation and code-based answer scoring, rather than relying on the LLM to self-grade, to keep evaluation objective and prevent malformed-input failures.

Customer Conversion Prediction in Digital Marketing

- Developed ML classification models to predict customer conversion, achieving 95% campaign-targeting accuracy.
- Executed end-to-end data preprocessing and exploratory analysis to uncover key conversion drivers and improve model performance.

Education

APJ Abdul Kalam Technological University

Aug 2019 – Aug 2023

B.Tech in Electronics and Communication Engineering (ECE)

CGPA: 8.22
